- A 1 hour onboarding session for delegates wishing to participate in the course using 3DGaia will be offered on Tuesday 3 Aug at 15:00pm UK time, via Zoom. The link to this session will be provided nearer the time.

- The minimum hardware requirements to run 3DGaia are:
  - Processor: Intel i5-4590 / AMD Ryzen 5 1500X or greater
  - Graphics Card: NVIDIA GTX 980 / AMD Radeon RX 590 or greater
  - Memory: 8GB+ RAM
  - System: Windows 10

- To download and run the software, users will require a minimum of 5GB free space on their hard drive.
- Stable local wifi internet connection is required (ethernet connection is preferable for stability but not essential).
- 3DGaia works with networking. Company/University firewall systems and VPN connections can prevent 3DGaia networking therefore we advise VPN connections to be disabled and for our software to be allowed through any firewall system.

NB: 3DGaia is a Windows-only based application so, regretfully, Mac users will not be able to run the software.
